Berwick a Tweed
Scotland
14 Oct 1873

My dear Sir
I thank you
much for your kind
favor of Oct 21 -
I received on my arrival
in New York to embark
for Europe when I arrived
yesterday. Your remarks
I read much - I have
strong hopes that that
found that there
stay in America
is very when awakening an
feeling that something should
be done to regulate forest
preservation but that there
are big land grants little
appears to be known of the
forest region of Iowa
and Germany and the

application made of it to the forest economy of Canada. I propose preparing an elementary introduction to the study of Forest Science in the Forest Economy — in the hope that some further publication may be undertaken by others and as also by British Colonists that I can help to know the information obtained.

I shall take it for granted should any special publication concerning your notice concerning the information regarding the forests of Canada I will let you know of it as well as other subjects seems only to
